Fundamentals of investing: Why invest?

Byron E. Caskey – Financial Consultant
Wells Fargo Advisors

10/11/2016
My Favorite Rules

The first rule of investing is don't lose money; the second rule is - don't forget rule number one.

- Warren Buffet

No one can count your money better than you.”

- Troy E. Bryant

Pay yourself first!
Where to Begin

1. Develop a Plan (6 mos., 1 year, 3 years)
   Where will you be? What will you need?

2. Emergency Fund 6-12 months of Expenses. Start Small: 1-3 months

3. Limit the use of Credit Cards if unable to pay off at the end of each month. **Do not buy material item that you do not need on credit!**

4. Make a Budget & Use Coupons!
   Stick to the Budget.
Where to Begin

6. Contribute to your Employer Savings Plan
   *At least up to the full match-this is free money that you don’t want to pass up.

7. Evaluate Living conditions

8. Shop current Insurance(s), loans, and/or bank accounts.

9. Learn to cook!

10. Revisit your plan Annually
What affects my credit score?

The Formula
Credit scores can be as low as 300 and as high as 850. There are five factors that determine where your number falls in that range:

- 35% of your score is based on your payment history
- 30% is based on current debts
- 15% is determined by credit history
- 10% is allotted to new credit applications
- 10% is about types of current credit

Tip:
Carrying high credit card balances can decrease your credit score.

Are you making saving and investing priorities?
Today’s retirement reality

Retirement savings – it’s up to you now

From 1980 to 2010, the changes in employer sponsored retirement plan offerings has changed dramatically.

Mckinsey & Company, 2011
Why aren't you signed up for the 401k?

I'd never be able to run that far.

I did a 10k wheelchair race once. The guy who pushed me still has whip marks.
Why people invest

- Life expectancy has increased
- You may be retired longer than you work
- You’ll need to finance your retirement

<table>
<thead>
<tr>
<th>Retirement age</th>
<th>40</th>
<th>45</th>
<th>50</th>

Be self-sufficient

- Life expectancy has increased.
- You can’t rely solely on Social Security benefits for funding retirement.
- In 2022, Social Security retirement program costs will begin to exceed trust funds’ income including interest.
- Social Security’s retirement trust funds will be exhausted in 2035.*

Social Security benefits could decrease as the age for receiving full benefits increases.

*Source: Social Security Administration*
More considerations for investing

- College costs continue to rise.
- Inflation affects your investment return.
Effects of inflation

Inflation’s powerful effects

If prices rise 4% annually:

One dollar today
Five years from now
10 years from now
20 years from now

$1.00 82¢ 66¢ 44¢

Relative worth

You may live longer than you think

Probability of a 65-year old in good health living to various ages

**MALE**

- 83 years old (50% chance)
- 91 years old (20% chance)

**FEMALE**

- 86 years old (50% chance)
- 94 years old (20% chance)

**COUPLE***

- 90 years old (50% chance)
- 95 years old (25% chance)

The importance of staying invested

Source: Morningstar and National Bureau of Economic Research (NBER). The market is represented by the Standard & Poor’s 500®, which is an unmanaged group of securities considered a representation of the U.S. stock market in general. Cash is represented by the S&P/BGCantor U.S. Treasury Bond Index which is comprised of sub-indices that are differentiated by the range of maturities of its constituents. This index seeks to measure the performance of the U.S. Treasury Bond market maturing in 0 to 1 years. Past performance is not guarantee of future results. This information is hypothetical and is for illustrative purposes only and not indicative of any investment. An investment cannot be made directly in an index. The data assume reinvestment of income and do not account for taxes or transaction costs.
Your real return adjusted for inflation and taxes

Based on 2% inflation and a 28% tax bracket. Figures are for illustrative purposes and are not intended to reflect actual investment performance.
Positioning assets for retirement income

What’s the difference?
Developing investment strategies can help you:

- Define financial goals
- Fight inflation
- Reduce taxes
- Manage the unexpected
- Understand and manage investment risk
- Provide money for regular and special expenses
- Enrich your retirement
What stage are you in?

- **Builders**
  - Younger than 35 years old
- **Cruisers**
  - Ages 35 to 50 years old
- **Coasters**
  - Ages 50 years and older
Builders: younger than 35 years

- Manage debt
  - Credit cards, auto loans, mortgage, etc.
- Build savings
- Identify insurance needs
  - Medical, life, car, etc.
- Develop systematic investing
  - Retirement plans or emergency savings
Cruisers: ages 35 to 50 years old

- Pay children’s expenses
  - Education: private schools and/or college
  - Weddings

- Accumulate investments
  - Retirement plan
  - Supplemental savings plan

- Maintain insurance coverage
Coasters: ages 50 years and older

- Pay down long-term debts
  - Mortgages, etc.
- Monitor your investment portfolios
  - Retirement-plan adjustments
- Review insurance needs
- Focus on estate preservation and long-term care
Life and disability insurance

- **Life insurance**
  - Provide for your family
  - Maintain up to 10 times your annual income

- **Disability insurance**
  - Protect your income
  - Create safety net if you lose your greatest asset – your income
  - Replace at least 60% of your income
Excuses not to invest

- Too young
- Don’t earn enough income
- Children’s expenses
- Mortgage payments
- Too late to invest
- Finally enjoying income after raising children
Where to invest

- Stocks:
  - Value fluctuates with market price
  - May pay dividends
- Bonds:
  - Pay interest
- Cash alternatives:
  - Checking and savings accounts
  - Bank CDs
  - Money market funds

Stocks offer long-term growth potential but may fluctuate more and provide less current income than other investments. Bonds offer a fixed rate of return and investment principal if held to maturity. The investment return and principal value of mutual funds will fluctuate, and shares, when sold, may be worth more or less than their original cost.
Easel Corporation

- Charter authorizes 20,000 shares of common stock
- Sells 10,000 shares at $10 per share
- Raises $100,000

Need to raise another $100,000
Easel Corporation

- Issue corporate bonds to borrow $100,000
  - Secured bonds
  - Unsecured bonds
What asset allocation?

The blending of stocks, bonds and cash alternatives in your portfolio
Matching asset allocation
